

Desulphurisation

Let's Do It Properly!

MethaTec Detox S Premium

- Unique combination consisting of a fast-acting iron component with a long-term effect,
- Especially efficient and cost-effective due to a minimum iron content of 50%.

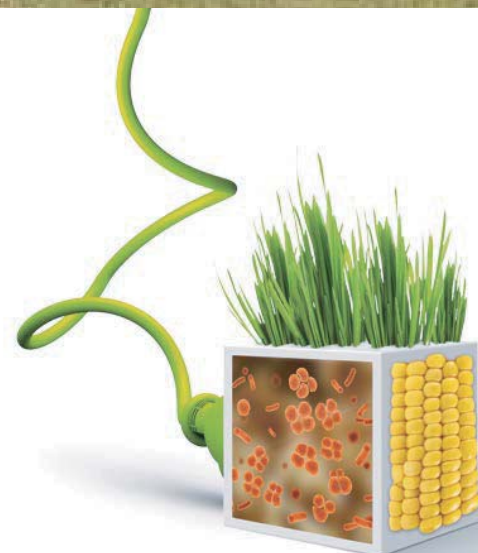

MethaTec Detox S Standard

- Contains ferric hydroxide which dissolves immediately,
- For biogas plants with short retention times.

Ferric Hydroxide is a non-hazardous alternative to corrosive Iron Chloride solutions; no environmental, safety or storage issues.

Ferric Hydroxide can be dosed with the feedstock; no need to open or dispose of bags. Ferric Hydroxide lasts longer than Iron Chloride solutions, with no H₂S peaks.

All that is left is a pallet; no IBC's to dispose of or pumps to flush out.
