

MethaTec® Essentials Basic

MethaTec® Essentials Basic is a granulated emergency mixture of essential micro elements with iron hydroxide as carrier. To compensate for acute deficiency situations and to reduce high levels of organic acids. If a trace element deficiency is found, MethaTec® Essentials Basic restores the basic supply of the bacteria immediately. The composition of the mixture is designed to quickly and effectively remedy a deficiency situation and ensures efficient breakdown of high levels of organic acids (acetic acid, propionic acid and others). MethaTec® Essentials Basic offers the best prerequisites for the subsequent use of the individual mixture MethaTec® Essentials.

Product description

- Appearance: brown powder

Product advantages

- Contains all necessary micro elements that must be balanced out
- Iron hydroxide as carrier
- Quick remedy to the shortfall
- Reliable effect

Packaging and Storage

- 20 kg fermentable bags
- Keep out of the reach of children.
- Store cool and dry (5 – 25°C). Protect from direct sunlight.
- Shelf life – 24 months

Dosage

The average application rate is 2 kg per 100 kW and day*.

**Biogas plants with very high proportion of manure or severe trace element deficiencies may have to use higher quantities.*
